

make a BaseClass FilterAnimelist. make filterOperation virtual. for each filter inherit from FilterAnimelist and override only filterOperation. all other methods are always the same.

FilterAnimelist

+FilterAnimelist(MainWindow mw, AnimelistManager alm, AnwalicService svc)
+clearFilter(): void
+applyFilter(): void
-filterOperation(Animelist al): void
-copyCurrentListToFilteredList(): bool
-disableUiElements(): void
-enableUiElements(): void

just press the "Clear Filter" button. It calls all this methods in this order.
